PROFESSIONAL SUMMARY

Software Developer with hands-on experience in developing and maintaining web and mobile applications. Contributed to multiple software projects involving backend development, API integration, databases, and system implementation using various technology stacks. Strong foundation in programming, problem-solving, and scalable application development. Experienced in collaborating within Agile/SDLC environments to deliver reliable, secure, and efficient software solutions.

WORK EXPERIENCE

Inspire Holdings Inc. - Software Developer

June 2026 - Present

Tech stack: Next.js, Nest.js, Typescript, Supabase, Prisma ORM, Postman, Git, Github, SDLC, Agile

- Worked as a Software Developer developing and maintaining various web-based systems and business applications while collaborating in an Agile/SDLC environment.
- Designed and implemented backend APIs, database structures, system integrations, and core business functionalities to improve application scalability, maintainability, performance, and overall system reliability across multiple projects using different technology stacks based on project requirements.
- Strengthened application security through authentication, authorization, API protection, access control implementation, debugging, QA testing, and system optimization to ensure stable and secure operations.

Inspire Holdings Inc. - Software Developer Intern

Feb 2026 - May 2026

Tech stack: Next.js, Nest.js, Typescript, Supabase, Prisma ORM, Postman, Git, Github, SDLC, Agile

- Worked as a Full Stack Web Developer for a client-based Pawnshop Management System, primarily focusing on backend development using NestJS, Prisma ORM, Supabase, and TypeScript while collaborating in an Agile/SDLC environment.
- Implemented Prisma ORM integration across the backend system to improve database management, scalability, maintainability, and overall application performance.
- Enhanced web application security by implementing Row-Level Security (RLS) in Supabase to strengthen data protection and minimize unauthorized access risks.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, TypeScript, PHP, Java, Python

Frontend: React.js, React Native, Next.js, Tailwind CSS

Backend: Node.js, Express.js, NestJS, Django, RESTful APIs, JWT Authentication, Prisma ORM

Database Management: Firebase, MySQL, MongoDB, Supabase, PostgreSQL

DevOps / Tools: Figma, Git, Github, Jest, Postman, Docker, Github Actions, CI/CD, ClickUp

Software Engineering: SDLC, Agile/Scrum

EDUCATION

Bachelor of Science in Computer Science

Taguig City University — September 2022 - June 2026

PROJECT

SnapNutrient MacroNutrient Food Scanner App - Fullstack Developer

2025

Tech stack: React Native, Nativewind, Expo, Firebase, Jest, SDLC, Agile

- Developed and maintained a full-stack mobile application using Firebase (Firestore, Realtime Database, Authentication, Cloud Functions) and Expo, implementing end-to-end features, backend logic, data persistence, and following SDLC methodologies (requirements analysis, design, development, testing, deployment).
- Enhanced application performance and user experience by designing and refining UI components, resolving bugs, and improving responsiveness and interaction flows.
- Increased application reliability and code quality by implementing unit testing and component testing, optimizing cloud-based data processing, and ensuring stable, scalable deployments.
