PROFESSIONAL SUMMARY

Computer Science graduate with internship experience building full-stack web applications, primarily focused on backend development using NestJS, Prisma ORM, Supabase, and TypeScript. Experienced in designing RESTful APIs, database management, and implementing secure, scalable solutions in Agile/SDLC environments. Passionate about backend engineering and continuously improving software development skills through real-world projects and modern technologies.

WORK EXPERIENCE

Inspire Holdings Inc. - Software Developer Jun 2026 - Present

Tech stack: Next.js, Nest.js, Typescript, Supabase, Prisma ORM, Postman, Git, Github, SDLC, Agile

- Develop and maintain backend features, RESTful APIs, and database solutions for multiple web applications and internal systems using NestJS, TypeScript, Prisma ORM, Supabase, and PostgreSQL.
- Implement new features, resolve production issues, and optimize backend performance to ensure reliable and scalable applications in an Agile/SDLC environment.
- Implemented endpoint authorization and access control by securing RESTful APIs with authentication and role-based authorization, returning appropriate HTTP 401 Unauthorized responses for unauthenticated requests.

Inspire Holdings Inc. - Software Developer Intern Feb 2026 - May 2026

Tech stack: Next.js, Nest.js, Typescript, Supabase, Prisma ORM, Postman, Git, Github, SDLC, Agile

- Developed backend features and RESTful APIs for a client-based Pawnshop Management System using NestJS, Prisma ORM, Supabase, and TypeScript while collaborating in an Agile/SDLC environment.
- Integrated Prisma ORM with PostgreSQL and Supabase to improve database management, maintainability, and application scalability.
- Implemented Row-Level Security (RLS) policies in Supabase to enforce role-based data access and strengthen application security.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, TypeScript, PHP, Java, Python

Frontend: React.js, React Native, Next.js, Tailwind CSS

Backend: Node.js, Express.js, NestJS, Django, RESTful APIs, JWT Authentication, Prisma ORM

Database Management: Firebase, MySQL, MongoDB, Supabase, PostgreSQL

DevOps / Tools: Git, Github, Jest, Postman, Docker, Github Actions, CI/CD, ClickUp, Figma

Software Engineering: SDLC, Agile/Scrum

EDUCATION

Bachelor of Science in Computer Science

Taguig City University — September 2022 - June 2026

PROJECT

SnapNutrient MacroNutrient Food Scanner App - Fullstack Developer 2025

Tech stack: React Native, Nativewind, Expo, Firebase, Jest, CI/CD, SDLC, Agile

- Built a full-stack mobile application using React Native, Expo, and Firebase, implementing user authentication, cloud-based data storage, and backend logic through Cloud Functions.
- Designed responsive UI components and optimized application performance by improving user interaction flows and resolving functional issues.
- Implemented unit and component testing using Jest to improve application reliability and maintain code quality throughout development.
